The China Products Exhibition - To Boost Manufacturing and Trading Opportunities for Indian Entrepreneurs

The economic focus of the world has gradually shifted towards India and China. By 2030, China and India are expected to be the first and third largest economies in the world, with the largest consuming populations that global companies would wish to attract.

Of all the BRICS countries, India has been the best economic performer in the last few years. India is now the world's fastest growing large economy with GDP growth rates reaching 7% and above in recent years. BRICS' growth in export-import (exim) containerised trade with the world grew 5.8% in the first half of 2016 led by India followed by China, with Indian volumes expected to grow 8% and China 6% by 2017.

Trade relations between India and China are getting stronger with trade growing from about \$3 billion in 2000 to achieving US\$100 billion worth of merchandise trade by 2019. China is India's largest trade partner and a sixth of India's imports are from China. India imports not only mobiles, laptops and consumer electronics from China but also tuberculosis and leprosy drugs, antibiotics and fertilisers to name a few.
